## 10 Reasons to Choose Caesarstone®

**Trendsetting:** Caesarstone's surface is versatile and functional with endless design capabilities, available in a large palette rich in color and texture, including a collection emulating limestone and marble.

**Unrivaled Service and Availability:** We're only a call away and we stock thousands of slabs in our large local warehouses, which make for a quick delivery.

**Natural Beauty:** Caesarstone is 93% natural Quartz.

**Non-Porous:** No sealer needed, mold and mildew resistant.

**Durability:** Caesarstone is heat-, scratch-, and stain-resistant.

**Cost Effective:** Comparable to granite cost! Caesarstone lasts a lifetime, so you do not have to replace it – EVER.

**Low Maintenance:** Soap and water is all that is normally required to clean Caesarstone.

**Recognized:** Caesarstone has been recognized by the Good Housekeeping Institute, earning the prestigious Good Housekeeping Seal.

**Lifetime Warranty:** Covered for Life.

**Eco-Friendly:** Caesarstone is committed to protecting our environment. From investing in recycling technologies in our plants to embracing environmentally sensitive suppliers and carrying GREENGUARD, NSF, ISO 14001 and 18001 certifications.

# Caesarstone Advantages

	CaesarStone Quartz Surfaces	Granite	Laminate	Solid Surface
Scratch Resistant	★	★	■	●
Stain Resistant	★	■	★	★
Crack Resistant	★	■	■	★
Heat and Burn Resistant	■	■	■	■
Resistant to Many Household Chemicals, Acids and Solvents	★	■	■	★
Low Maintenance	★	■	■	●

## Comparative Tests

The following tests show the superiority and the outstanding advantages of CaesarStone's physical properties compared with various typical natural stones (performed by Breton spa, Italy)

	CaesarStone	Marble (Botticino)	Granite (Rosa Fiorito)	DIN Standard
Flexural Strength (kg/cm <sup>2</sup> )	515	60	134	52112
Impact Test (cm)	135	29	61	2234
Water Absorption by Weight (%)	0.02	0.55	0.33	52103
Compressive Strength (kg/cm <sup>2</sup> )	2200	2161	1921	52105
Freezing Compressive Strength (after 25 cycles)	2082	2082	1906	52104

## Care and Maintenance

A hard, nonporous surface makes Caesarstone simple to clean. In most cases, soap and water or a mild detergent is all that is required to maintain its luster. If necessary, use a nonabrasive cleaning product such as Method® Daily Polish Spray or Method® Daily Stone Surface Wipes. Adhered materials such as food, gum, nail polish, or dried paint can be scraped away with a plastic putty knife; metal marks left by the putty knife can be removed with Method® Daily Polish Spray or Method® Daily Stone Surface Wipes. Thoroughly rinse the surface with clean water to remove residue.

**Stubborn Stains or Dried Spills** Use a soft cloth with warm water and mild soap or detergent. If needed, apply common, nonabrasive, household cleaners such as Soft Scrub® Liquid Gel with Bleach or Comet® Soft Cleanser Scratch-Free Cream with Bleach. To avoid dulling the surface's shine, make sure to use a nonabrasive cleaner.

**NOTE:** do not use cleaning products that have a high pH level (over 8), such as oven cleaner or paint remover, as they may etch and damage the surface.

**Honed Finish Cleaning and Maintenance** Please understand that Honed finishes will require more daily maintenance than our polished finishes. Since there is more exposed surface area with honed finishes, metal marks, fingerprints and other signs of daily living will show on honed material. Most of these marks can be easily removed with little effort and cleaning products such as Soft Scrub® Liquid Gel. For tough stains, work the area with a Scotch-Brite® Blue pad.

**Heat Resistance** Caesarstone can tolerate moderately hot temperatures for brief periods of time. Prolonged exposure will result in discoloring or other types of damage.

Please inform your customers that they should avoid direct contact between very hot pots and the Caesarstone surface. Excessive localized heat may damage the surface or cause hairline cracks to appear. We always require the use of an insulator/hot pad/trivet especially when using cooking units such as electric fry pans/woks/kettles.

**Tough, Yes – Indestructable, No** As with any surface, Caesarstone can be permanently damaged by exposure to strong chemicals and solvents that undermine its physical properties. Do not use products that contain trichloroethane or methylene chloride, such as paint removers or strippers.

Avoid any highly aggressive cleaning agents such as oven/grill cleaners and dishwasher agents that have high alkaline/pH levels. Products containing oils or powders may leave a residue. Should your surface accidentally be exposed to any of these damaging products, rinse immediately with water to neutralize the effect.

Method® Daily Granite cleansers are approved by Caesarstone for use on quartz surfaces.
